Week 2	Remembrance Day Soldiers, lest we forget cross...
Week 3	Fairy Tales Cinderella, little red riding hood...
Week 4	All About Me Hand prints, body outline...
Week 5	Circus Clowns, clown face painting...

Highlights of the Month

October was an exciting month for every child at our Academy. We implemented a fully-featured Preschool Program component for all child care kids. This resulted in dramatic increase in children's level of engagement with their learning and development.

As always, we were excited to celebrate cultural festivals, and had a lot of fun with Diwali and Halloween!

All children now receive the following instruction on a regular basis in Preschool Program Studio, Room 6, in the East Wing of our Campus:

Early Numeracy (Numbers and Mathematical Operations)

Early Literacy (Letters, Sounds, Words and Sentences)

Digital Resources (Children's rhymes and poems)

Audio and visual books (Amazon Kindle picture books)

Worksheets (practicing with pencil holding, early writing, arts)

Library Access (access to books on manners, family, weather, science experiments)

Projectors, on-site printing, iPad (children can view live digital content and much more)

Notable Moments

Preschool Program for All Kids

We worked diligently throughout October to put together an exciting and educational Preschool Program component for every child. Watching the kids light up as they engaged in learning, and incorporating technology, made it all worth it. Kids lovingly call the Preschool Program their School, which we are happy to hear!

Diwali and Halloween Celebrations

We proudly celebrate all cultures equally, and this month the spotlight was on Diwali! We had amazingly dressed children, decorations all over the Academy and a jubilant environment for all staff!

By now most parents have seen our Halloween Spirit. The whole Academy was decorated by Ms. Shally Goyal and support staff to bring the excitement and mystery to every child at the Academy.

Preparing for Kindergarten

Children are now receiving programming that is similar to early stages of Kindergarten. We have developed a comprehensive curriculum that teaches children how to hold a pencil, write their name, day of the week and time and much more. We also incorporate yoga, art, digital multimedia and will be introducing meditation!
